WITH TO-BE-MADE APPLICATIONS. The registrars of voters. Tyler D. Guy and the reliable of the piles of applications of the critics list must be and the piles of applications filed in the first district. Desired districts but the first or Central district to the large piles of applications filed in the first district. Owing to lack of time and te the fact that scores of duplicate spalications from women have found that was into hardguarters the registrars were unable on Wednesday evening a give an accurate statement as to the turned into the first district, due to the fact that a number of application. A revision of the application filed by women in the other five districts, due to the fact that a number of application production of the probate was endorsed for the fact that a number of application product into the first district, due to the fact that a number of application product into the first district, due to the fact that a number of application product into the first district, due to the fact that a number of application product into the first district, due to the fact that a number of application product into the first district, and the first district is should have been turned in to other districts, makes office. The registrars of voters, Tyler D. Guy

heen turned in to other districts, makes office.

Second District 638 Third District 561

"My Crawford Is Really Two Ranges in One"

ee AND I can use them together or separately, just as I wish. See what a nice gas stove I have at the end of the coal range, where it is most convenient! Five gas burners on the top, a great roomy oven, with a rack, and a folding broiler below the oven!

"But much as I like the gas stove I simply couldn't get along without the coal range. Right now, you see, I've get my cold pack canner on the coal stove, while my jelly is boiling on the gas and the sugar is warming in the oven. And there's bread baking in the coal oven, too. That helps me save fuel -and I get a lot more done in a day.

eerPHERE'S another splendid thing about my coal range-the Crawford Single Damper. I set the knob at 'Bake,' 'Check.' or 'Kindle,'-which are plainly marked on the stove top-and I can always be sure my oven will be just the right temperature. This damper also regulates the heat under the top griddles. "And here, too, is another reason why I'm so fond of my Crawford. Tucked in behind those doors in the stove base is a pair of interchangeable hods. As soon as I use up the coal in the one on the right, I will take out the one on the left which has been catching the ashes from the chute, and move the other over into it's place. Then I can carry the one with ashes down cellar, empty it and bring it back full of coal-all in one trip.

TTS the neatest, cleanest way of taking care of the ashes, and so much easier to handle than the oldfashioned ash-pan. And I like to be able to keep my coal hod out of sightit makes the kitchen so much tidier.

"These twin hods are an exclusive feature of the Crawford Range-and so is the Single Damper. Every day I discover new Crawford advantages. One of them is its economy-I figure that the fuel it saves will just about pay for my
